

# Ekran System solution:

Monitor activity and detect insider threats

## ARCHITECTURE DETAILS

### Supported OS:

- Windows and macOS desktops
- Windows, Linux, and Unix servers
- Virtual infrastructure, inc. Citrix

### Solution Architecture:

- Agent-based on-premises software solution
- Web-based management tool

## FEATURE SET

### Monitoring:

- Screen video recording with multi-layered index (applications, URLs, keystrokes, etc.)
- YouTube-like video player
- Advanced search and reporting

### Incident response:

- Alerts on events
- SIEM and ticket system integration
- Live session view and user blocking
- USB device detection and blocking

### Access management:

- Built-in access management tools: authentication for shared logins; two-factor authentication; one-time passwords

### Deployment and maintenance

- Flexible and scalable licensing, floating licenses
- Easy system deployment
- Remote agent install and automatic updating

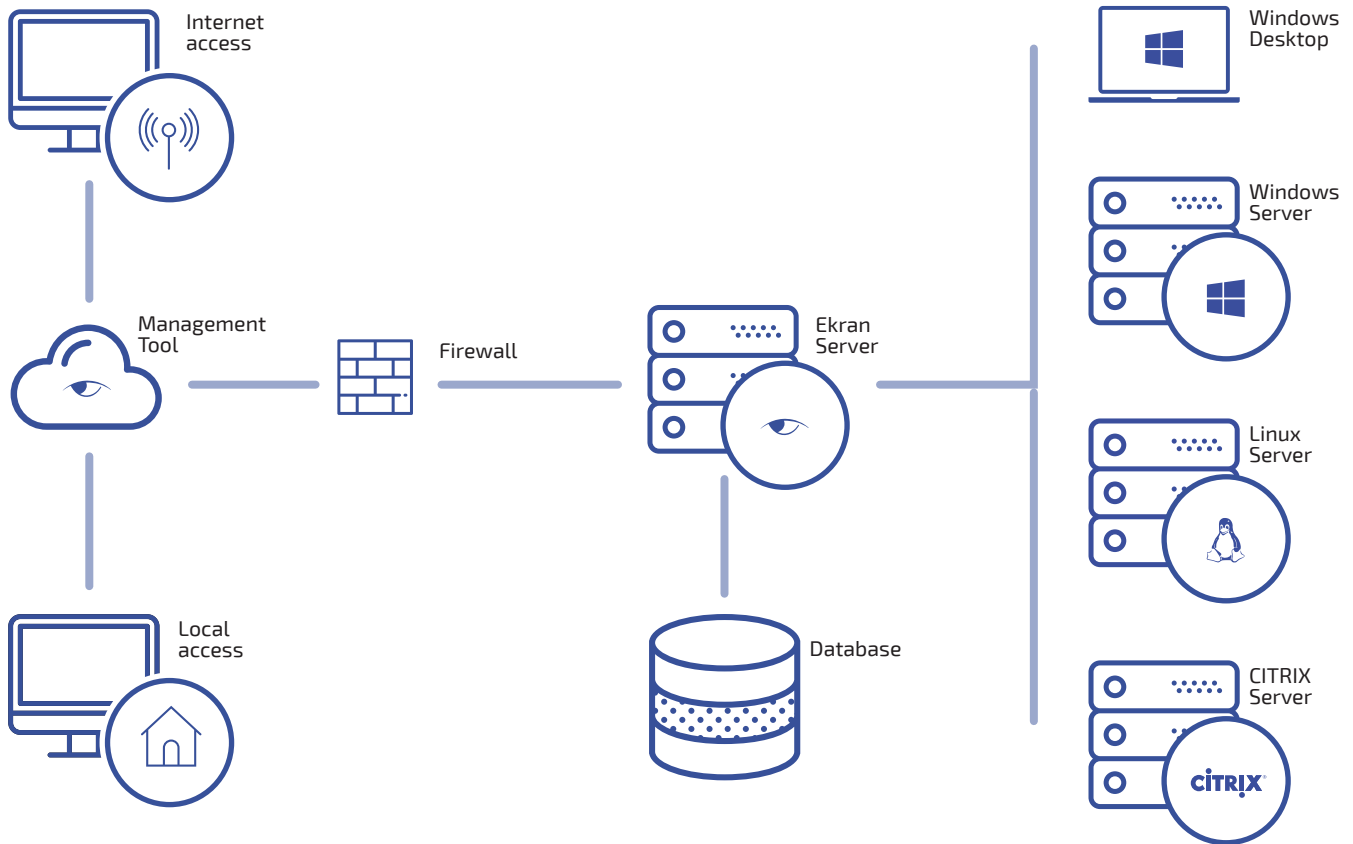

**SEE DEPLOYMENT SCHEMES AT THE BACK**

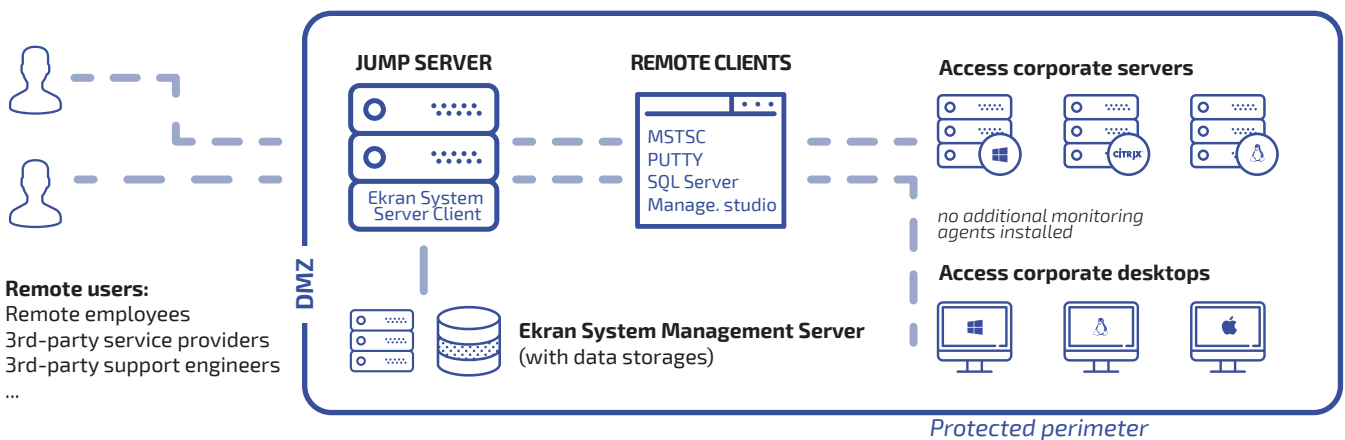

# Ekran System Deployment Architecture

## REGULAR DEPLOYMENT SCHEME

Non-intrusive; more metadata gathered; almost no performance impact; easy maintenance; no infrastructure changes are necessary

## JUMP-SERVER STYLE DEPLOYMENT

Additional security; better endpoint performance

*\*Both regular and high availability deployment available*
